

Gnostic Pagan Pantheon and Correspondences

The Gnostic Pagan Pantheon is a reflection of the Tradition's affirmation of global ethnic inclusiveness. The Pantheon also reflects a close affinity (at least on one level) with the traditional Gnostic Christian belief in the existence of 7 primordial and androgynous or bi-sexual Immortal Beings collectively called Archons or Guardians (the Pagan Gods & Goddesses). Both the Gnostics and Greek Pagans also believed in Personal Guardians called daemons.

-

The Gnostic Pagan Pantheon very roughly and at that only in the most abstract terms--corresponds to the Archons Major. For example, Eee-A-O (or I-A-O) is similar to the Gnostic Pagan Maya; Eloaii to Nuit; Pistis to Isis; Sophia to Ma'at; Adamos to Amun; Sabaoth to Horus; Yaldabaoth and Samael to Set; Oraios to Osiris, etc. However, distinctions with these as well as with other traditional Gnostic Christian beliefs are manifold. For example, The School draws a distinction between the Graeco-Egyptian Gods & Goddesses named above with traditional Gnostic Archons (who are usually viewed as inherently evil.) The Gnostic Pagan calls the 5 Powers Archons Major; They BECOME thru us, as we TRANSFORM thru them--and vice versa. The Gnostic Pagan Tradition calls the negative rulers of the Earth plane Archons Minor or Oligarchs; they are mortal humans who exploit the Earth for their own selfish ends. The School advocates overthrowing the Archons Minor/Oligarchs through a process of Global Social Revolution that will eventually bring down every State Capitalist government currently in existence, replacing them with expanded economic democracy administered through an enlightened Global Planned Economy.

In addition, Gnostic Paganism agrees with Gnostic Christianity in that it views the god of the Old Testament (YHVH, corrupted as the tribal god "Yahweh," and later "Jehovah" see below) as a false god, the illusory manifestation Demiurge--transformed through the Gnostic Pagan understanding as mortal ego-mind.

Mortal ego-mind is the dark veil of illusion that entraps the Originating Divine Consciousness (AMUN) of Universal Light within the self-limiting alienation of doubt, fear, insecurity and attachment to the bonds of gross materialism--i.e. "Original Sin." Whereas Gnostic Christians sought to flee the world of appearances, Gnostic Pagans seek to TRANSFIGURE, or spiritually transform, it. Also, unlike Gnostic Christians, we do not believe in Original Sin by reason of birth, or in the ultimate dualistic existence of Good vs. Evil.

The traditional concept of Archons Major implied that these Beings were androgynous. The Gnostic Pagan School visualizes them as embodying one or more manifestations of the primordial Yin and Yang, Shiva and Shakti, Male and Female cosmic energies emanating from AMUN. Thus, Gnostic Pagan

"deities" or Metaphysical Currents can represent one or more of the following possibilities: (-) Shiva (-) Shiva [= SET]; (+) Shakti (+) Shakti [= NUIT]; (+) Shiva (-) Shiva [= OSIRIS]; (+) Shakti (-) Shakti [= ISIS], etc.

AMUN can be understood as the originating cell (Divine Consciousness) of the Hebrew Kaballah's Tree of Life, or the DNA imprint of that cell--forever and continuously replicating itself (the "Big Bang") on every possible level of manifestation. 19th century philosopher Friedrich Nietzsche termed this the "eternal recurrence of the same." In other words, no matter what "happens" in the universe, it is always a variation of the same Originating Consciousness, or AMUN.

Gnostic Pagans view the Tree of Life, not so much as a description of an externalized hierarchal order, but more as an internal reality of every single molecule and atom in existence--including those of the human brain (the metaphysical center of human reality.) For the purposes of occult working, we separate this concept into 4 major divisions--Fire, Earth, Water and Air. These 4, in turn, correspond to the Gnostic Pagan 4 Powers of Manifestation--as well as to the Archons of Christian Gnosticism, the Hermetic Zodiacal Guardians, the Hebrew-Christian-Moslem YHVH (or, JHVH -- each letter corresponding to one of the 4 Powers), and the elemental complexes of all pagan pantheons, including those of Islam and Buddhism.

[NOTE: Relating to YHVH, Y = Daughter of Fire / Ma'at / Petro, H = Father of Water / Osiris / Congo, V = Son of Air / Horus / Rada, H = Mother of Earth / Isis / Santeria. This Gnostic Pagan interpretation reflects The Tradition's belief that the Hebrew language – like Ancient Egyptian hieroglyphics – was an inspired form directly transmitted to and communicated thru the human brain, unlike contemporary languages which reflect historical transmutation and corruption of Originating Sources.]

The Gnostic Pagan Pantheon represents an evolutionary PANTHEISTIC Gnostic interpretation of Cosmic Reality, and incorporates as many ideals of traditional Gnosticism as it rejects. The world of Appearance & Illusion is not inherently evil, it is a CONDITION Amun self-created laying the foundation for the experience of WILL (TIME) & LOVE (GROWTH or MOTION—see also, Numbers, Magick & Motion). These Goddesses and Gods may still be called upon in ritual, using their original names in their native lands.

NOTE: A listing such as **Saturnus** - (Set-Osiris) indicates that the deities in parenthesis represent a combination of Spiritual Currents embodied in the composite entity Saturnus.
